BUTTERFLY BUSH

Butterfly Bush Will Bloom Profusely the First Summer
Choice 60c each; 3 for \$1.65; 6 for \$3.00;
12 for \$5.50, prepaid.

These hardy plants offer finer cut flowers than probably any other and their long season of bloom (from July until frost) makes them very desirable. The tops frequently die back to the ground in winter, but the following spring they start up and soon are blooming again. We offer many entirely new colors. Butterfly Bushes like plenty of sunshine. Fertilize them with bone meal, manure or high grade fertilizer. They will thrive in almost any kind of soil if you feed them well. We ship strong **field grown** plants with good roots and tops trimmed properly for planting. They are sure to bloom the first summer.

CHARMING. New pink. Beautiful bushy plant growing five feet tall. Very striking in the landscape and flowers from early July until frost. The individual flowers are quite large and the spikes open up full length. Beautiful pink and a lovely cut flower. Especially fine when used with Delphinium.

DUBONNET. Beautiful wine-purple and named after the popular French wine of that name, Dubonnet. In sunshine and under lamp the color is dark red. The spikes are solid and well filled. Fine for cutting, very hardy, and should be in every garden.

HARTWEG. Large bright lavender panicles on beautifully formed spikes. A lovely shade and combines with the other varieties to offer this pleasing contrasting shade. Hardy and free flowering.

ROYAL RED. The Sensational New Butterfly Bush. From July to frost this variety produces an abundance of bright wine-red panicle flowers that attract instant attention. A new and distinct color and very beautiful in bouquets and very attractive in the flower border. The strong field-grown plants we offer this year are easy to make grow and will bloom profusely the first summer.

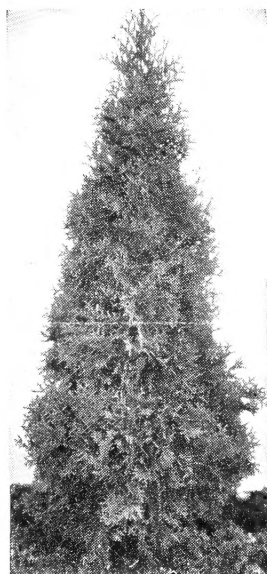

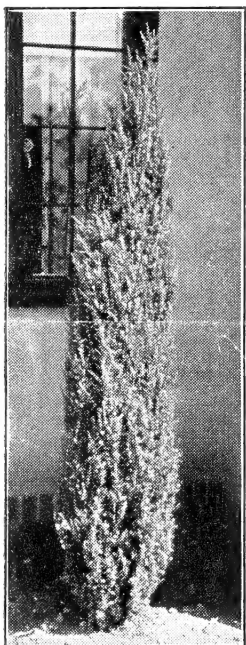

75c each; 3 for \$2.00; 6 for \$3.75, postpaid.
Patent No. 556.

Russell Lupines

Plant for fine bloom next summer. One of the finest and most colorful border plants. Blooms June and July. Lupines should be planted deep, so the top of the crown is covered with about two inches of soil. They like sun but will thrive in partial shade. They like an acid soil. If your soil is not acid then you should work in about two tablespoons full of common Epsom salts or aluminum sulphate around each plant.

SELECTED RUSSELL HYBRIDS—You will find in our reselected Russell Lupines, gorgeous colors, blues, pinks, reds, yellows, purples, etc. Bi-colors such as red and bronze, red and white, purple and cream, blue and white, yellow and orange, pink and white, etc. The standards one color, the keel another. Individual flowers above average size, some being an inch across. The flower spike resembles a well rounded column of sweet peas. All flowers open at one time from top to bottom. 3 to 5 feet tall. All colors assorted. We do not have them in separate colors.
